Re: Acela Biotek Exclusive License of Michigan State University  
*Polymicrobial Soil Enhancer Technology*

Dear Dr. Nguyen:

This letter confirms our earlier conversations regarding the *Polymicrobial Soil Enhancer Technology* developed by Dr. Lalithakumari Janarthanam, Dr. C. A. Reddy, and Michigan State University (MSU).

The license between MSU and Bio Soil Enhancers, Inc. has been terminated, and Bio Soil Enhancers no longer has the rights to make, use, sell or distribute products based on MSU's patented technology.

Acela Biotek has the exclusive, worldwide license to make, use, sell and distribute products based on MSU's patented *Polymicrobial Soil Enhancer Technology*.

I wish you and Acela Biotek continued success in commercializing this technology for the benefit of the public.

Sincerely,

MSU Technologies

Richard W. Chylla, Ph.D., CLP, RTTP  
Executive Director

RWC/tb
